Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Miller et al (5,838,437).

Regarding claim 1, Miller (Fig. 1 and 2) discloses a broad spectrum reference light source 8, a fixed Fabry-Perot etalon 7 that produces “multiple, very accurately spaced, wavelengths” (Col. 1, line 33), a tunable Fabry-Perot filter 21 that can be swept through its tuning range through variances of its tuning voltage as generated by sweep generator 26, and a zero crossing detector 24.

Regarding claim 2, Miller’s device discloses all the claimed elements as discussed above. Therefore, the claimed method can be applied to Miller’s device in order to achieve the desired results as Miller’s device is a reference system for calibrating optical devices.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al (5,838,437).

As for claims 3-10, the substitution of the specific light sources and specific differing kinds of etalons for the light source and etalon of Miller's device is well known in the art, and it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the appropriate substitutions as claimed, as the substitutions would not result in any change to the functionality of the device.

As for claims 11 and 12, the use of interpolation and extrapolation to determine non-experimentally obtained values of an experimental process is well known in the art.

Response to Arguments

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection. The amendment changed the reading of the claims, giving certain language in the original claims patentable distinction that didn't exist originally. This required a new search, which lead to the new rejection given above of the claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
